Square Edge MEUF24H  
Bullnose Edge MEBF50H  
Bullnose Board MEBB360H  
Fascia Board MFN360H

#### Burnt Cedar/Embered

Square Edge MEUF24R  
Bullnose Edge MEBF50R  
Bullnose Board MEBB360R  
Fascia Board MFN360R

#### Ebony Grey

Square Edge MEUF24Y  
Bullnose Edge MEBF50Y  
Bullnose Board MEBB360Y  
Fascia Board MFN360Y

Square Edge

Bullnose Edge

Bullnose Board

Fascia Board

## Working Specifications

For all applications we recommend a 1/8" space between the sides of boards (or 1/4" if using the DuoFix side-fastening guide) and 1/16" gap at the ends on butt joints. A 1/2" gap should be left between the boards and any abutting vertical surface to facilitate drainage.

The maximum unsupported overhang for the boards is 2" and each cut board must be supported by a minimum of three joists. Where a board crosses a joist, two Durafix screws are needed. At the end of the boards we recommend three Durafix screws.

### Residential applications

52 psf uniform distribution load

Joists must support boards at 16" on center if boards are at 90° to joists. If boards are at 45°, space joists at 12" on center.

**Tip:** Space joists at 15<sup>5</sup>/<sub>8</sub>" to minimize wastage.

### Commercial applications

104 psf uniform distribution load

Joists must support boards at 12" on center if boards are at 90° to joists. If boards are at 45°, space joists at 9<sup>1</sup>/<sub>2</sub>" on center.

**Tip:** Space joists at 11<sup>3</sup>/<sub>4</sub>" to minimize wastage.

## Complete your deck

Millboard decking edges and fascia provide the perfect finishing touch to transform your deck into a stunning and long-lasting masterpiece. To explore the complete range available please visit our website: [www.millboard.com/edging-and-fascias](http://www.millboard.com/edging-and-fascias)
